Special Instruments

Special instruments are essential in various surgeries to ensure precision and efficiency. Here are some examples

Orthopedic Surgeries

Bone saws and drills: Used in joint replacements like hip or knee replacements. **Rongeurs:** Used to cut small pieces of bone in spinal or joint surgeries.

Cardiothoracic Surgeries

Heart retractors: Used in open-heart surgeries like CABG. **Cardiovascular clamps:** Control blood flow during heart surgeries

Neurosurgeries

Cranial drills: Open the skull in craniotomies. **Microsurgical forceps:** Used in brain tumor removals.

Plastic and Reconstructive Surgeries

Skin hooks: Used in facelifts. **Dermatomes:** Harvest skin in skin grafting.

Plastic and Reconstructive Surgeries

Skin hooks: Used in facelifts. **Dermatomes:** Harvest skin in skin grafting.

Minimally Invasive Surgeries

Laparoscopes: Used in laparoscopic surgeries like gallbladder removal. **Robotic arms:** Used in robotic surgeries for precise movements.
